

## Interior Designer Columbia, SC

Quackenbush Architects + Planners is seeking an experienced and talented interior designer to join our award winning practice specializing in creative and thoughtful design solutions throughout the state of South Carolina. Q+ offers a well-balanced, holistic approach to work and life. We enjoy the benefit of a small, tight-knit firm structure that allows individuals to have a voice and opportunities to cultivate successful careers and connections with peers.

### Responsibilities

- Work collaboratively with architects and other designers on projects at all design phases including programming, schematic design, design development, and construction documents.
- Develop compelling interior design concepts based on project context, history, or other key project goals or guiding principles.
- Participate in presentations, both in-house and to clients, and assist in preparation of presentation content and materials.
- Produce design documents, including both drawings and detailed specifications, working independently or as part of a team depending on project requirements.
- Manage schedules and budgets for interior renovation projects through design, bidding, and construction phases.
- Design and detail custom casework and millwork in addition to other interior elements including flooring, partitions, ceilings, etc.
- Coordinate with engineers on building systems including structural, mechanical, electrical, and plumbing.
- Conduct site visits as necessary for field investigation and during construction
- Lead furniture procurement projects including selecting furniture pieces and finishes, coordinating with vendors, and presenting to clients.

### Required Qualifications

- 5-7 years of relevant experience in educational, commercial, and/or institutional interior design.
- Exceptional design sensibility with a commitment to creativity and attention to detail.
- NCIDQ certification or actively seeking certification.
- Extensive knowledge of interior materials and finishes, including an in-depth awareness of available products and their technical capabilities and limitations.
- Familiarity with the International Building Code, ANSI 117.1, and other applicable codes.
- Experience in producing quality construction documents and an understanding of building detailing.
- Proficiency with Revit is required. Experience with 3D modeling and visualization software including Enscape and Lumion is preferred.

### Application

Applicants may submit a digital cover letter, resume, and portfolio to [pdq@quackenbusharchitects.com](mailto:pdq@quackenbusharchitects.com). We will review applicants and contact individuals of interest for an interview.

Must possess a valid driver's license, and due to the nature of this work, U.S citizenship is required.
